Rigscape

Rig platforms egress systems

Rigscape Advantages

- No struggling with connect/disconnect in a critical situation
- Worker is only tied off to the Rigscape, egress is simple & immediate
- If an injury were to occur prior to egress, the weight activated release & the automatic braking system will carry the worker to the ground quickly & safely
- The Rigscape is designed with a patented braking system. This allows the worker to travel away from the rig at upwards of 22 ft/sec (6.7m/sec) & allows a soft landing at less than 2 ft/sec (0.6m/sec)
- Rig in/out can be done in as little as 15 minutes

The Rigscape difference

The system is designed for multiple runs which allow:

- Confidence in the egress system can be acquired through repetition
- Safety drills can be performed on a regular basis to instill an instinctual response in an emergency situation

General specifications:

- Engineered lightweight aluminum construction
- Capacity - 310 lbs (140kg), 1 person
- Magnetic braking system
- Vertical heights: from 26' (8m) to 135' (41m)

Manufactured in: Drayton Valley, Alberta, Canada

Our Egress Solutions:

- *7 Years in development*
- *Recipient of the **Emerging entrepreneur of the year award 2013***
- *Currently hold US patent # 13/576,543
US patent # 61/329,384
US patent # 12/331,105*
